— consentpage

Instructions to Participants

Thank you for participating in the survey! We are collecting data about your long-term experience with the AI-GENe Program. This data will be used to guide the AI-GENe Program and may ultimately be used for a research publication and reporting to the NIH.

Data confidentiality

Responses are anonymous. The potential risks to you are small. The potential benefits to the education community are high—we will use this information to guide development of education material. Please do not include names, institution names, email addresses, or other identifying information in your written responses.

Data sharing

No personally identifiable information, such as response timestamps, will be shared.

Participation

You must be 18 or over to participate. You will be asked a series of questions about your experience with the AI-GENe modules. **By completing this survey or questionnaire, you are consenting to be in this research study. Your participation is voluntary, and you can stop at any time.** You do not need to answer optional questions. Any answers you have filled in will be automatically submitted if you close the browser tab.

Depending on how you answer the survey, this will take about **3–6 minutes** to complete.

By participating in this survey, you understand and accept the inherent risks associated with transmitting information over the internet.

Consent

The first question asks whether you are at least 18 years old and whether you consent, or agree, that data from your responses may be used for AI-GENe development purposes.
